1 Exercise 8.5

Using the course dictionary you created above, print out all the courses above 300.

Answer appears after one blank page (so you don't peek).

Are you sure you're ready to peek?

Answer appears after one blank page (so you don't peek).

Are you sure you're ready to peek?

2 Possible Solutions

```
In [4]: course_dict = {'CANA100':(100, 'Oh, Canada!', 'J. Trudeau'),
                        'GEOG378':(378, 'Something about Python', 'S. Goring'),
                        'FLH0345':(345, 'Full House in modern popular culture', 'D. Tanner'),
                        'PAND843':(843, 'Graduate Seminar: Do you even Panda?', 'P. Anda')}

    for k in course_dict:
        if course_dict[k][0] > 300:
            print course_dict[k][0:]

(843, 'Graduate Seminar: Do you even Panda?', 'P. Anda')
(378, 'Something about Python', 'S. Goring')
(345, 'Full House in modern popular culture', 'D. Tanner')
```
