1 Exercise 8.4

Construct a dictionary to store the courses you took last semester by number. Each course should have a course title and professor name. (Hint: you may want to use tuples to store the information for each course.)

Answer appears after one blank page (so you don't peek).

Are you sure you're ready to peek?

2 Possible Solutions

```
In [2]: course_dict = {'GEOG378':(378,'Something about Python','S. Goring'),  
                       'FLH0345':(345,'Full House in modern popular culture','D. Tanner'),  
                       'PAND843':(848, 'Graduate Seminar: Do you even Panda?','P. Anda')}
```
