SelfAssessment101

November 4, 2015

1 Exercise 10.1:

Modify the program so no empty lines appear in the output. [Hint: Remember the strip() method, see the notes on Python strings.]

Answer appears after one blank page (so you don't peek).

Are you sure you're ready to peek?

2 Possible Solution

```
In [1]: classFile = open("ClassRoster.txt")
        for student in classFile:
            print student.strip('\n')
```

```
Abel, John: Geography
Lewinski, Ralph: Communication Arts
Lassen, Bella: Environmental Studies
Poppich, Bruce: Geography
Sternobli, Cassandra: Undeclared
Tavlin, Robin: Geography
```
